English, Tamil

About Me

I am a budding software developer with a passion for solving modern-day challenges through coding. As software technologies continue to evolve, I am eager to contribute to shaping the future of the industry. I believe that continuous learning and adapting to new tools and frameworks are essential to staying ahead and achieving success in this dynamic field.

Professional Experience

System Engineer - Frontend Developer

Tata Consultancy Services Ltd., India

- As an angular developer, worked in insurance products for 3 years
- Developed and implemented front end features in various angular and c# applications of Tata Bances.
- Collaborated with designers and developers for functional features.
- Continuously participated in peer code reviews and idea sessions
- Worked in an agile environment
- Assisted in testing (Jasmine) and writing unit tests
- Managed several devices used for testing and assisted in product deployment.

Click And Rent

- A one stop website for renting apartments and houses.
- Developed using MERN
- [Click&Rent](#)

Weather Wise

- **An app for your daily weather updates.**
- Developed using React
- [Storm Watch](#)

Career break

I relocated to the Netherlands with my husband and took a break from my career to focus on raising my son. During this time, I balanced family responsibilities while staying connected with the tech industry through online courses and self-study, ensuring I remained up-to-date with the latest developments in software technologies.
