PROFESSIONAL SUMMARY

I am a passionate and dedicated frontend developer who recently completed a rigorous web development bootcamp, where I delved into the world of coding headfirst. My journey began in web development several years ago, and since then, I have had the privilege of working on diverse products. I am poised to contribute to forward-thinking teams, collaborate on pioneering projects, and ardently pursue opportunities that align with my unwavering passion for learning and innovation.

EXRPERIENCE

Assistant system Engineer - Tata Consultancy Services Ltd., India - Aug 2017 - Nov 2019

- Built and maintained user interfaces using Angular framework, integrated front-end components with back-end services, ensured cross-browser compatibility and responsive design, and worked with version control system (Git) in an Agile Environment.

EDUCATION

- **Masters in Applied Electronics**   Aug 2015 - May 2017
  Government College of Technology, Coimbatore, India
- **Bachelors in Electrical and Electronics Engineering**   Aug 2010-May 2014
  Dr N G P technology, India

  Ironhack, The Netherlands

PROJECTS

Click&Rent – Developed the project in MERN stack in collaboration during my bootcamp. The project delivers a one stop website which eases renting accommodations.

Weather Wise – This project will help you to be updated with weather every day. This project was developed using React and Node JS.

SKILLSET

Javascript - Typescript HTML5/CSS3 - Angular – C++ - C#- dotNet - NodeJS - ExpressJS - React - Redux- MongoD- SQL – Jasmine - Git - GitHub - Analytical Reasoning - Problem Solving – Organized

---

CAREER GAP

In 2019, I moved to the Netherlands with my family. I took some time off for taking care of my son. In the meantime, I was studying online courses and attended a bootcamp. Currently, I am working on web developments projects.
