About Me

I am a passionate frontend developer who recently completed a rigorous web development bootcamp. From studying Electrical engineering to working as a software developer, I have enjoyed the various aspects in the world of technology. I have always been a person who loves science and technology and I aspire to learn more from it. Apart from coding, I love movies and cooking.

Professional Experience

Assistant system Engineer - Front End Developer(Angular)

Tata Consultancy Services Ltd., India
Aug 2017 - Nov 2019

- Developed and implemented front end features in various insurance products of Tata Bancs.
- Collaborated with designers and backend developers for functional features.
- Continuously participated in peer code reviews and idea sessions
- Worked in an agile environment
- Assisted in testing (Jasmine) and writing unit tests
- Played a part in product deployment
- Managed several devices used for testing
